Bugs Report	

## Purpose

This document presents findings referring to the tests done on the website of the "WOBI" chain in Israel.

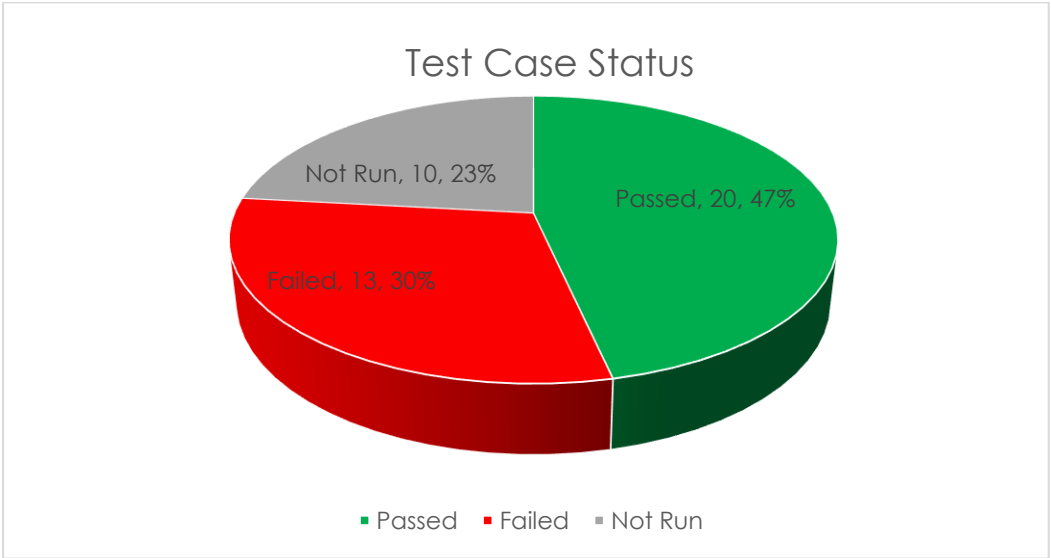

The tests were carried out on the main functions of the site, which refer to operations such as: navigation and displaying the menu, placing an order registering on the site, using various features, reading information about the Insurance options.

## Application Overview

The website of "WOBI" is mainly used as a Web and Mobile website to display the chain's menu and allows you to place orders from the menu of insurance options for customer.

## Metrics

Passed	Failed	Not Run	Total
20	13	10	43

## Recommendations

1. Have the option to return to the main page after scrolling to the bottom of the page.
2. Have to fix the UI/UX design on the web, there is many design mistakes that make difficult for the user experience.
3. Make sure that all links and fields are show in on the web and on the mobile.

## Conclusion

Following the various tests done on the "WOBI" website, quite a few bugs were found.

Most of them have a degree of severity between low and minor.

So, despite the relatively large amount of bugs, the website still functions

reasonably well and performs its main functions, which are viewing the menu and ordering insurance to the customer.

As a result, I recommended releasing the site.

### Bugs List

Bug13#-The system allows to send document with invalid ID.

Bug12#- The accessibility icon doesn't exist On the (ביטוח דירה) page.

Bug11#-The link (ביטוח תכולה) hides the title (התחילו כאן).

Bug10#- The accessibility link hides the link (מצטרפים חדשים) in the page of (ביטוח רכב).

## לפני שקונים ביטוח רכב, משווים וחוסכים

לא מחדשים ביטוח רכב לפני שמשווים מחירים!  
בגלל שקיימים המון משתנים המרכיבים את ביטוח הרכב:  
סוג רכב, שנת ייצור, פרופיל הנהג, כמות נהגים, עבר ביטוחי, ועוד.  
ובגלל שחברות הביטוח מעדכנות תעריפים לעיתים קרובות,  
מומלץ להשוות מחירים לפני שאתם בוחרים.
